

# 2015 Annual Report

WaterStep trains people in developing countries to use safe water solutions like water chlorination, health education, sanitation, and well repair. We empower communities to develop sustainable solutions for their own water needs. We believe that the best solutions to water problems are rooted in simple tools and effective training.

In 2015, **YOU**  
**SAVED 275,000 LIVES WITH SAFE WATER**

Putting children back in classrooms, empowering mothers, and restoring a sense of pride and hope to communities thirsty for longer, fuller lives.

Deployed **183** mini-water treatment systems around the world to **15 countries**, providing up to **1.83 million** gallons of safe water a day.

Partnered with staff, board, donors, and volunteers to celebrate **20 years** of saving lives with safe water.

Conducted **36 virtual classroom sessions**, using the Internet to extend our impact and empower more international partners to transform their local communities.

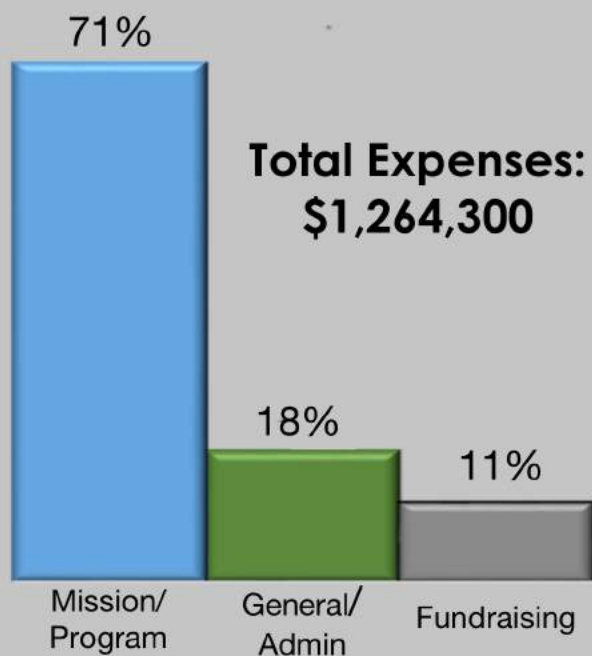

Sent **160 people** into the field to educate and train communities who are committed to seeing their lives changed by safe water.

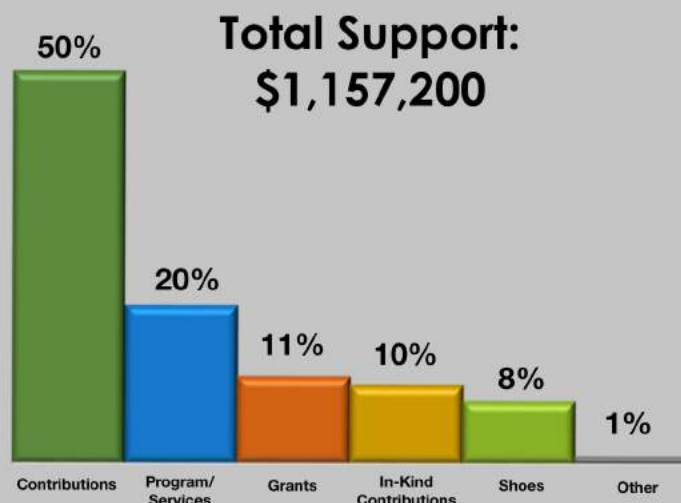

**Trained 40+ individuals** to provide disaster relief to victims of the earthquake in Nepal, meeting an immediate need with a sustainable resource.

## 2015 Expenses

## 2015 Support
